Preparation

All surfaces to be painted should be clean, dry and free from grease. Loose, flaking or blistered paint should be completely removed. Prime all new and bare surfaces with the appropriate Leyland Primer. Rub down previously painted surfaces with fine waterproof abrasive paper and rinse thoroughly. Avoid the inhalation of dust. Wear a suitable face mask if dry sanding. Special precautions should be taken during surface preparation of pre-1960s paint surfaces over wood and metal as they may contain harmful lead. For further advice contact Technical Advisory.

Application

Stir well before use. Apply by brush or roller. The brush should be fully loaded for best results. Do not thin. Apply one or more coats as required and allow 16-24 hours between coats under normal conditions.

Cleaning

Remove as much product as possible from application equipment before cleaning. Replace lid firmly. Clean equipment immediately after use with white spirit or turpentine substitute. Some local authorities have special facilities for the disposal of waste coatings. Do not empty product into drains or watercourses.
